

# YourID for Dating Platforms

**Identity is a central issue on dating platforms**, and that means handling substantial quantities of sensitive user data. Together with the risks that identity fraud can pose to end users, that amounts to serious responsibilities on the part of dating platforms themselves. Yet the means of authenticating users and securing their accounts vary considerably across different services.

YourID offers a solution. As the world's first trusted identity platform based on shared governance and the flexible use of whichever technologies are best suited to a given scenario, YourID offers essential benefits to organizations across a wide range of sectors:

1. **Significant reduction of costs**
2. **Defending against identity theft and fraud**
3. **Delivering the best user experience**
4. **No user adoption problems due to joint effort**
5. **Ensuring regulatory compliance**

For online dating platforms specifically, here's what those benefits look like in detail:

- With YourID you save 90% of authentication implementation costs, by sharing these costs with all other partner platforms. Authentication security is guaranteed by a single entity – YourID – which means no money wasted on multiple authentication providers or building your own costly solution. In addition, you minimize administrative costs for you and your clients by eliminating password resets and token replacements.
- Customers gain easy access to online accounts through biometric authentication and YourID assures that customers are who they say they are at each and every visit.
- Improved onboarding thanks to YourID's streamlined 'one-click' account creation process.

## **Benefits of a Trusted Identity Platform**

- Phishing attacks can no longer target customers, because there are no passwords to steal.
- Fake sites designed to capture customers' Personally Identifiable Information (PII) will be flagged, as YourID verifies not only site visitors, but the websites themselves.
- YourID can support end user accounts linked to phone numbers and email addresses, or accounts linked to fully verified identities, eliminating anonymity and the potential for catfishing or other kinds of platform misuse.
- GDPR compliance is ensured as end users gain control over the sharing and revoking of their data.
- YourID will offer dedicated promotion of your dating platform during the platform's launch phase.
